

ANNOUNCEMENT

Tokyo Power Market Seminar

June 14 (Thursday), 2018

Conference Room A (4F), IINO Hall, Tokyo

Language: English/Japanese (Simultaneous Interpretation System)

Organizer: Ministry of Economy, Trade and Industry (METI)

Purpose of Seminar

The electricity retail market has been showing intensifying competition with the increase of new entrants to the market and a wide variety of price packages they present since the electricity deregulation in April 2016. At the same time, the trade volume is increasing tremendously through the electric power exchange market which is an indispensable means to obtain power source for the new entrants. On the other hand, many of these new players are now exposed to the risks of price fluctuations, leading them to consider risk management imperative. Looking at the power generation field, new challenges emerging such as how to secure long-and-medium-term investments, while market transactions constantly increasing. Facing such circumstances, "Tokyo Power Market Seminar" is scheduled on June 14, 2018 inviting overseas intellectuals to learn their experience and lessons acquired by the power liberalization in Europe and the U.S. and to consider the direction of Japan's power liberalization ahead. We can have a good chance to consider Japan's power liberalization in future through "Tokyo Power Market Seminar" this time. We hope a lot of people will participate in this Seminar.
