Foreword

Coal is excellent resource in terms of its stability of supply and economy. It is used as an extremely important energy resource in combination with other energy resources and also a raw material in the iron & steel industry and so on. To ensure stable supply and demand of coal, it is necessary to increase the coal production corresponding to the expansion of the coal demand in the Asia-Pacific region and to continue the effort which uses coal efficiently and economically considering the environment.

Under such circumstances, the Clean Coal Day Executive Committee comprising representatives from 7 coal-related organizations expects to hold a special event to let you know the present status as well as the global trend of coal-related technologies including CCT, seeking your deep apprehension of the role played by coal in achieving the best mix in the future. We hereby humbly invite you to attend the event with your kind understanding of our intention.
